

KAW NATION

HAZARD MITIGATION PLAN

Mitigation Planning is a community-driven process to help state, local, tribal, and territorial governments plan for hazard risk.

By planning for risk and setting a strategy for action, we can help reduce the negative impacts of future disasters.

Kaw Nation Emergency Management office is updating the current outdated Hazard Mitigation Plan (HMP).

This HMP is required by Tribal and Federal agencies so Kaw Nation can be eligible for certain types of State and Federal hazard mitigation and disaster relief funds.

This website will be used during the planning to post information, collect comments, and post documents.

The most recent updated mitigation plan was reviewed last month at the Council Meeting and was approved, the plan will next be sent to FEMA for review.

Any comments can be sent to
